

Employee Benefits HOT TOPICS

Workshop Series for Tampa Bay Area Employers

Join us for open, honest conversations about changing the way employers manage their benefits programs.

Let's face it, Employee Benefits are a major headache for most employers. However, all of us know there are innovative ways to make things better. That's exactly what we will be learning about. We promise - **HOT TOPICS is NOT a sales pitch** - but rather, this workshop is an opportunity to learn, compare, and share ideas that are working here in the Tampa Bay area.

Let's Discuss These Hot Topics

Local Employee Benefits Outlook

You'll gain insight on successes in containing healthcare costs and ways to gain a competitive edge by offering benefits that help employers to attract and retain the best talent.

Strengthening Employee Resiliency

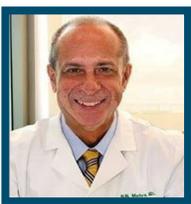

Stressful life events often negatively impact your employees' ability to remain resilient and productive. How can employers be compassionate, provide adequate resources, and choose solutions that won't crush the bottom line? We will explore some compelling options, including alternatives to traditional EAPs.

6 Ways Advocacy is a Game-Changer

93% of Americans say they don't trust their insurance company to provide unbiased guidance for navigating our complicated healthcare system. With an advocate, your employees are supported through their unique journeys, and employers don't have to manage the process. We will share an example where the end result is stabilization of premiums and a happier, more confident workforce.
